

A SMARTER WAY ➤ TO FIND YOUR NEW HOME

Presented By
**Kristal, Charmi, Disha,
Hassan, Constance**

THE BACKSTORY

PROBLEM

- Hundreds of listings with misleading photos
- Outdated or inaccurate availability information
- No clear understanding of the real apartment layout
- Limited insight into the surrounding neighborhood
- Renters must visit multiple apartments to verify listings

Students and young professionals need a faster, visual, and more intuitive way to discover rental options.

**APARTMENT HUNTING TODAY
IS CONFUSING, TIME-
CONSUMING, AND INEFFICIENT.**

THE BACKSTORY

PERSONA

Age: 23

Occupation: Marketing Associate

Situation: Moving for a new job

Apartment Needs

Studio or 1-Bedroom

Near public transportation

Budget under \$1,800/month

Goals

Find an apartment quickly before starting work

Avoid unnecessary apartment visits

Make a confident decision remotely

SAD DISHA

Frustrations

Apartment photos can be misleading or outdated

Difficult to understand layout and space

Traveling to multiple apartments across the city

Wasting time visiting places that don't meet expectations

MARKET OPPORTUNITY

\$4T+

**U.S. RENTAL
MARKET VALUE**

44M

**RENTER
HOUSEHOLDS**

65%

**YOUNG ADULTS
RENT**

Students and young professionals frequently relocate for:

- Universities
- Internships
- Early-career jobs

This creates constant demand for rental discovery platforms.

THE VIDEO GENERATION

90%

**GEN Z WATCHES
SHORT VIDEOS
DAILY**

95 MINUTES

**AVERAGE TIKTOK USAGE
PER DAY**

1200%

**MORE ENGAGEMENT
VS TEXT & IMAGE**

- Consumers increasingly prefer visual discovery rather than traditional search interfaces.
- Instead of browsing static photos, users want to experience spaces visually before making decisions.

INTRODUCING

THE SOLUTION

A VIDEO-FIRST RENTAL DISCOVERY PLATFORM

- Discover apartments through short videos
- AI-powered search for rental discovery

TikTok meets Zillow, designed for renters.

USER EXPERIENCE

START WITH A PROMPT

Users simply describe what they need in natural language

"Help me find a studio apartment near DePaul University within a budget of \$1,800"

Users can also choose manual filters for custom search such as:

- location
- price range
- apartment type
- proximity to campus or transit

USER EXPERIENCE

PERSONALIZED APARTMENT DISCOVERY FEED

Users receive a scrollable video feed of apartments.

Each listing includes:

- Video walkthrough of the apartment
- Price and location details
- Apartment type and amenities
- Agent profile and ratings

AGENT EXPERIENCE

AGENT PORTAL

The platform operates as a marketplace where anyone can list a rental property through short video listings.

This Includes:

- Independent real estate agents
- Small brokerage firms
- Property managers
- Landlords renting apartments
- Individuals renting rooms or shared spaces

AGENT EXPERIENCE

LISTING FEATURES

Users listing properties can:

- Upload 30–60 second videos of apartment or room.
- Manage rental listings
- Receive renter inquiries
- Track listing engagement and views

TRUST & SAFETY SYSTEM

VERIFIED MARKETPLACE

To create a reliable marketplace:

- Agents go through identity verification
- Listings are reviewed and moderated
- Renters can leave reviews and ratings

This builds trust between renters and agents.

GO-TO MARKET STRATEGY

BUILDING THE SUPPLY SIDE OF THE MARKETPLACE

01 INDEPENDENT AGENTS

- Partner with independent agents and small brokers
- Offer free early listings and video promotion

02 INDIVIDUAL RENTERS

- Allow users to list rooms, subleases, and apartments directly
- Target platforms like Facebook Marketplace, Craigslist, and housing groups

03 UNIVERSITY COMMUNITIES

- Engage student housing groups and campus communities
- Encourage listings for shared apartments and subleases

MONETIZATION STRATEGY

VIDEO-DRIVEN MONETIZATION

Revenue is generated through advertising integrated directly into the video discovery feed.

01 PROMOTED LISTING VIDEOS

Agents pay to boost property videos.

- Higher visibility in discovery feed
- More renter inquiries
- Faster tenant discovery

02 SPONSORED PROPERTY CAMPAIGNS

Property developers promote new buildings.

- Featured listings on home feed
- Branded apartment video tours
- Highlighted “Featured Properties”

MONETIZATION STRATEGY

IN-VIDEO ADS & TARGETED ADVERTISING

03 IN-VIDEO BRAND ADVERTISING

Ads appear within video viewing experience.

- Pre-roll video ads
- Mid-video sponsored ads
- Skippable ads

04 TARGETED RENTAL ECOSYSTEM ADS

AI prompts and search filters enable highly relevant advertising

Potential advertisers:

Furniture • Moving services • Insurance • Internet providers

GROWTH STRATEGY

2027 - MARKET EXPANSION

Expand to cities with large student and young professional populations
Grow supply of listings through agent partnerships

01

02

03

2026 - LAUNCH

Launch the platform in Chicago.
Target students and young professionals.
Grow early demand through university networks and social media

2028 - PLATFORM GROWTH

Expand beyond entry-level rentals.
Introduce premium and luxury apartment listings.
Partner with large property developers and apartment communities.

VISION

A platform where renters can simply describe what they want and instantly discover homes through videos.

TODAY

Rental discovery is search-based

"Finding your next apartment should be as easy as scrolling."

TOMORROW

Rental discovery will be video-first and AI-driven

HAPPY DISHA

THANK YOU

APPENDIX

Jobs to be done

Functional

Help me quickly find apartments or rooms that match my budget and location without spending hours searching multiple platforms.

Emotional

Help me feel confident and less stressed about choosing an apartment by allowing me to experience the space through better visuals.

Social

Help me find a place that fits my lifestyle and allows me to live in a neighborhood where I feel connected and comfortable.

RAV Framework Hoop

Resources	Activities	Value Proposition
Video-first platform optimized for real estate discovery	Personalized AI search trained on user swipe behavior Adjacency – AI Roommate matching with preference data	For Renters: Video-first discovery – 90% of Gen Z watches short videos daily, 1,200% more engagement vs text/image
AI recommendation engine matching budget, location, and lifestyle	Content moderation & identity verification for trust Adjacency – Agent certification program “Hoop Certified” badge	For Renters: "AI understands what I'm looking for"
Independent agent network	Agent onboarding and training for video content creation	For Renters: See real layout before visiting
User trust/ratings system Adjacency: Rental application portal with one-click across properties	Partner ecosystem integration (moving, furniture, utilities) Adjacency – Affiliate marketplace earn commission on bookings	For Renters: Save time visiting apartments you'll like
Small engineering team enables quick experimentation.	Self-serve ad platform	For Agents: Showcase listings through video
cloud-based, low overhead costs	Cross-platform distribution on TikTok/Instagram for Gen Z reach	For Agents: Reach motivated renters
Strategic moving/furniture partnerships	Continuous AI model refinement	For Agents: Pay only for performance
Database with AI learning proprietary base.	University and influencer marketing for targeted acquisition	For Developers: Sponsored campaigns to qualified renters

Price-Performance Curve Hoop

Integration Framework

Example of Zillow's NE Migration

- **Zillow Expanding from Listings to iBuying**

Zillow originally operated as a real estate search platform where users could browse property listings. The company later migrated into iBuying (Zillow Offers), where it directly purchased homes and resold them. This move shifted Zillow from being only a marketplace platform to a transactional real estate participant.

PPC Zillow NE Move

Example of Disruption (Need for SW Migration)

Traditional platforms such as Zillow, Realtor.com, Apartments.com, and Facebook Marketplace operate in the mainstream market, offering a wide range of properties for rent and sale.

Platforms like Hoop focus directly on this underserved low-end segment, providing a simpler marketplace and discovery process tailored to these renters.

This creates a disruptive entry from the low-end market, forcing mainstream platforms to migrate South-West (SW) by simplifying their offerings and addressing lower-budget rental segments.

Category of Disruption

Low-End Market Disruption

- Targets budget-conscious renters
- Focuses on room rentals and shared housing
- Provides simpler and faster rental discovery

Industry Reaction

Incumbent platforms can through partial adaptations, including:

- Adding more rental listings
- Introducing basic room-rental filters and sublease options
- Improving mobile search tools

However, their core models remain focused on mainstream and higher-value listings, leaving room for specialized platforms.

Recommended Adaptation Strategy

To respond effectively to this disruption, mainstream platforms should:

- Develop dedicated low-budget rental sections
- Enable direct listings for individuals renting rooms or shared spaces
- Integrate AI-based search and simplified discovery tools
- Adopt video-based property discovery experiences
- Include a differentiator, like rent reporting to credit bureaus

As platforms like Hoop serve underserved renters at the low end of the market, mainstream real estate platforms may need to migrate SW by simplifying their offerings and addressing the needs of lower-budget renters.

Weaknesses of the Business Model

Marketplace Cold Start Problem

Requires both renters and listings to grow simultaneously.

Dependence on User Listings

Quality and reliability depend on individual renters and small agents.

Strong Incumbent Competition

Platforms like Zillow, Realtor.com, and Facebook Marketplace already have large audiences.

Sustainability Principles

Low-End Market Focus (OE + CI)

Targets budget renters while improving operational efficiency (OE) and customer intimacy (CI) through simpler discovery and personalized search.

Scalable Digital Platform

Marketplace model scales without owning physical housing assets.

Efficient Resource Use

Video discovery reduces unnecessary property visits and travel.

Better Use of Existing Housing

Allows individuals to list spare rooms and shared spaces, improving housing utilization.

Rental Market Statistics

- **\$4 Trillion Rental Market**

The single-family rental market alone in the U.S. has been estimated at around \$4 trillion in value according to Freddie Mac research.
