

# EPIPEN CASE

By: Jada, Johnny,  
Disha, Krishna

# TABLE OF CONTENTS

- \* Summary of Issue
- \* Politics
- \* Price Increases, Are they justifiable?
- \* Bersch's Testimony
- \* What should Bersch do?

# SUMMARY

## 1. Background

- EpiPen is a life-saving device used for severe allergic reactions.
- Manufactured and distributed by Mylan.

## 2. Price Hike

- Price increased from ~\$100 to over \$600 per two-pack between 2007 and 2016.
- Led to public outrage, media attention, and congressional scrutiny.
- Accusations of corporate greed and unethical pricing practices.

# POLITICS

## ISSUE

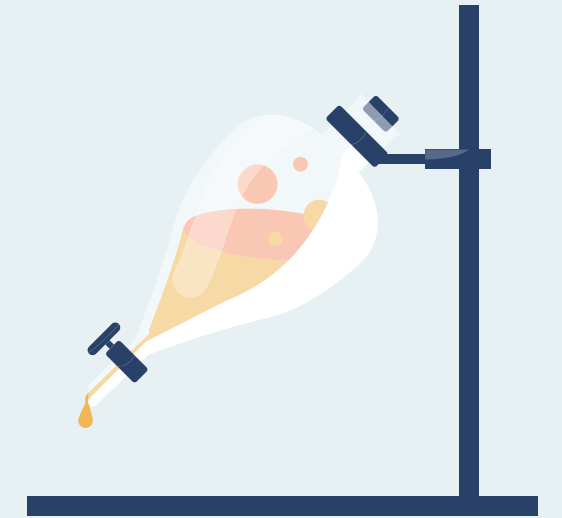

- Political connections raised concerns about regulatory favoritism.
- Delayed approval of generic alternatives benefited Mylan.
- Legislation mandated EpiPen stockpiles in schools, boosting sales.

## OUTCOME

- Eroded public trust in pharmaceutical regulations.
- Fueled debates on drug pricing and government influence.
- Increased demand for transparency and accountability.

# PRICE INCREASES

Bersch's justifications for price increase considered three factors

## Innovations

EpiPen design improvement to secure safety and ease of use.

## Supply Chains

Middlemen absorbed the cost, leaving Mylan with less profit.

## Market Factors

Regulatory issues and changes and limited competition contributed to higher costs.

# BERSCH'S TESTIMONY

- Bresch's testimony appeared evasive and disconnected
- Bresch introduced a generic model that would counter consumer sentiment
- Damage inflicted will be difficult to offset
- Increased market competition eventually drove down price and expanded consumer offerings

# SOLUTIONS

1

**Price Regulation**

2

**Price  
Transparency**

3

**Non-profit  
Manufacturing**

4

**Insurance and  
Subsidies**

**THANK YOU!**
